## Guild Facebook Use

As a woodworker in the 21<sup>st</sup> Century, you need to know how to use a computer to navigate the Internet, and how to use it to grow your woodworking skills.

One way to do that is to visit our Guild's website!

[www.westmichiganwoodworkers.org](http://www.westmichiganwoodworkers.org)

There you will find websites of suppliers of woodworking equipment, supplies and other woodworking related websites under the 'Links' heading.

If by now you don't know how to send and receive e-mails or how to navigate the Internet you are denying yourself access to valuable woodworking tips, and getting free project plans or having the ability to communicate with other woodworkers and suppliers

**Go to the Guild's Facebook Page and Website regularly!** They are **FREE** to use. They have valuable information just for **YOU!** Our Facebook Page is updated almost daily with new woodworking articles, tips, and project plans for **FREE!!**

The Guild's Facebook Page and Website, plus using other woodworking Internet sites, is the cheapest and fastest way to learn more about woodworking than any other seminar, retreat, or woodworking school.

## President's Corner

**By:** Les Derusha

*Happenings effecting the WM Woodworkers during the month of May and beyond in 2019.*

Ideal Park Christian Reformed Church (our new home) will be holding a craft show on Saturday November 2, 2019. Details to follow later. The cost to have a table space is yet to be determined, but I am sure it will be reasonable.

### **Michigan Guild Summit**

On May 9th, representatives from eight Michigan Woodworking Guilds from across Michigan met in DeWitt, Michigan at a Summit. The Summit was sponsored by the Mid-Michigan Woodworkers Guild and chaired by Matt Rosendaul, President of the Mid-Michigan Woodworkers Guild.

Les Derusha, Jim Jakosh and Tom McDonald, represented the WM Woodworkers Guild.

The topics covered included the importance of well-written Guild By-Laws; Program presenters that were well received at the different Guilds, and the importance of good audio-visual equipment at Guild meetings, good meeting locations, and possible Guild public service projects.

There was a presentation by a Tax attorney about the benefits of being incorporated as a 501-C7 charitable organization.

We also discussed the use of different software packages help run a Guild. The Guild from Detroit volunteered to share a copy of their Microsoft ACCESS Database format with the WM Woodworkers Guild.

The meeting was very helpful and the attendees expressed a desire to have other such summits on in the future.

What more could we ask for???

## 'Show & Tell'

**Doug Scott** presented an upholstered walnut footstool he reproduced for his own use from a customer brought to him for repair.

**Richard Kroll** talked about his segmented Beer Mug he created WITHOUT the use of a wood Lathe!

**Steve DeVires** presented two items, a scissor-lift he built to help him install upper kitchen cabinets and a specialized router table to help him create the small parts he needs to build his detailed wooden models.

Guild Member, **Steve Babcock**, was the main presenter for the May Guild meeting. Steve is also professional photographer, as well as an excellent woodworker, who, per Steve, is always working on improving his woodworking skills. At our May meeting, he shared his knowledge as a professional photographer on how to create an infinity background for photos of projects and how to use a basic desk lamp with everyday LED light bulbs to help create better photographs of tabletop sized projects. He also talked about light filtering using different colors of photographic light filters and how shadowing can be used to enhance project photos. He also noted that a 'Bright Sunny Day' is not the best time to take pictures out of doors. Overcast days are provide a much better setting because of reduced glare and unwanted shadows.

45+ Attendees waiting for Raffle results. Wayne Veneklasen and Tom McDonald conducting the raffle drawings for items donated by our members and supporter such as  $\frac{3}{4}$ "+ clear Maple cut-offs, misc. tools, and tree stump slabs.
